Bed bugs!

This won't be easy, but without following these steps, you're unlikely to get rid of the bed bugs, even with our help.

To help you prepare for our arrival, here are a few things that will help make our treatment more effective:

INSIDE:

- Disassemble your bed frame and place it so we can access both sides of all pieces.
- Vacuum all pieces of your bed frame and mattresses.
- Take drawers out of your dressers, nightstands, and anything else that is used for storage. Yes, everything. Wash all clothes as HOT as possible, and DRY them. Put other items in plastic bags.
- Vacuum the entire room thoroughly, paying close attention to where the wall meets the floor.
- We'll need access to the floor in the entire room(s), so don't leave boxes or clutter in the closets.
- Remove outlet covers and switch plates. Please don't electrocute yourself.
- NEVER EVER accept used mattresses, bed frames, or other furniture from anyone whom you have the slightest inkling may be associated with bed bugs.

If you have questions or would like to know more about how we'll treat your residence, please contact us at 800.422.4803.
